

Environmental Policy

Introduction

Brockwell Energy Limited & its associated companies are committed to sustainable development and environmental stewardship in all aspects of our business. We recognise our responsibility to protect the environment for present and future generations and strive to continually improve our environmental performance. We ensure our business operations minimise adverse environmental impacts and promote sustainability by aligning and certifying our processes with the ISO 14001: 2015 Standard.

Compliance with Legal and other Requirements

Adherence to all relevant environmental legislation, regulations, and other requirements related to our business activities and services. We maintain an up to date understanding of applicable legal and regulatory changes to ensure timely compliance.

Pollution Prevention and Resource Efficiency

Implement best practices to prevent pollution, minimise waste, and efficiently use energy, water, and other natural resources in our operations. We will develop and promote projects that reduce carbon emissions and enhance environmental sustainability with aim to reduce our carbon footprint and improve resource efficiency.

Environmental Impact Assessment and Mitigation

Conduct thorough environmental impact assessments (EIAs) for all renewable energy projects to identify, assess, and mitigate potential adverse environmental effects.

Continuous Improvement

Continuously improve our environmental performance through regular monitoring, evaluation, and implementation of best practice.

Stakeholder Engagement and Communication

Engage with stakeholders, including customers, employees, suppliers, local communities, and regulatory authorities, to promote transparency and collaboration on environmental issues and clearly communicate environmental policy and performance to stakeholders.

Emergency Preparedness and Response

Establish and maintain and review emergency preparedness and response plans to address potential environmental incidents promptly and effectively.

Sustainable Design and Innovation

Integrate environmental considerations into the design, construction, and operation of renewable energy projects. Encourage innovation in developing and adopting technologies and practices that enhance environmental performance.

Policy Review

This Environmental Policy will be reviewed annually or when significant changes occur to ensure its continued relevance and effectiveness. Any updates will be communicated to all stakeholders.

Approval

The Chief Executive Officer (CEO) is responsible for ensuring the implementation and review of this policy.

Neil Young, Chief Executive Officer
