

DALFAD WIND FARM

Viewpoint 16
New Cumnock

Existing View: This viewpoint is located at the top of a footpath leading through a public park at the western edge of New Cumnock. The western view is over the park, sports pitch and a tree belt to a rolling horizon with some forestry, where operational turbines are visible above nearby houses. To the north, views are over the park and houses beyond to a tree scattered skyline formed by low hills just beyond the settlement. Longer views in other directions are restricted by nearby houses and trees.

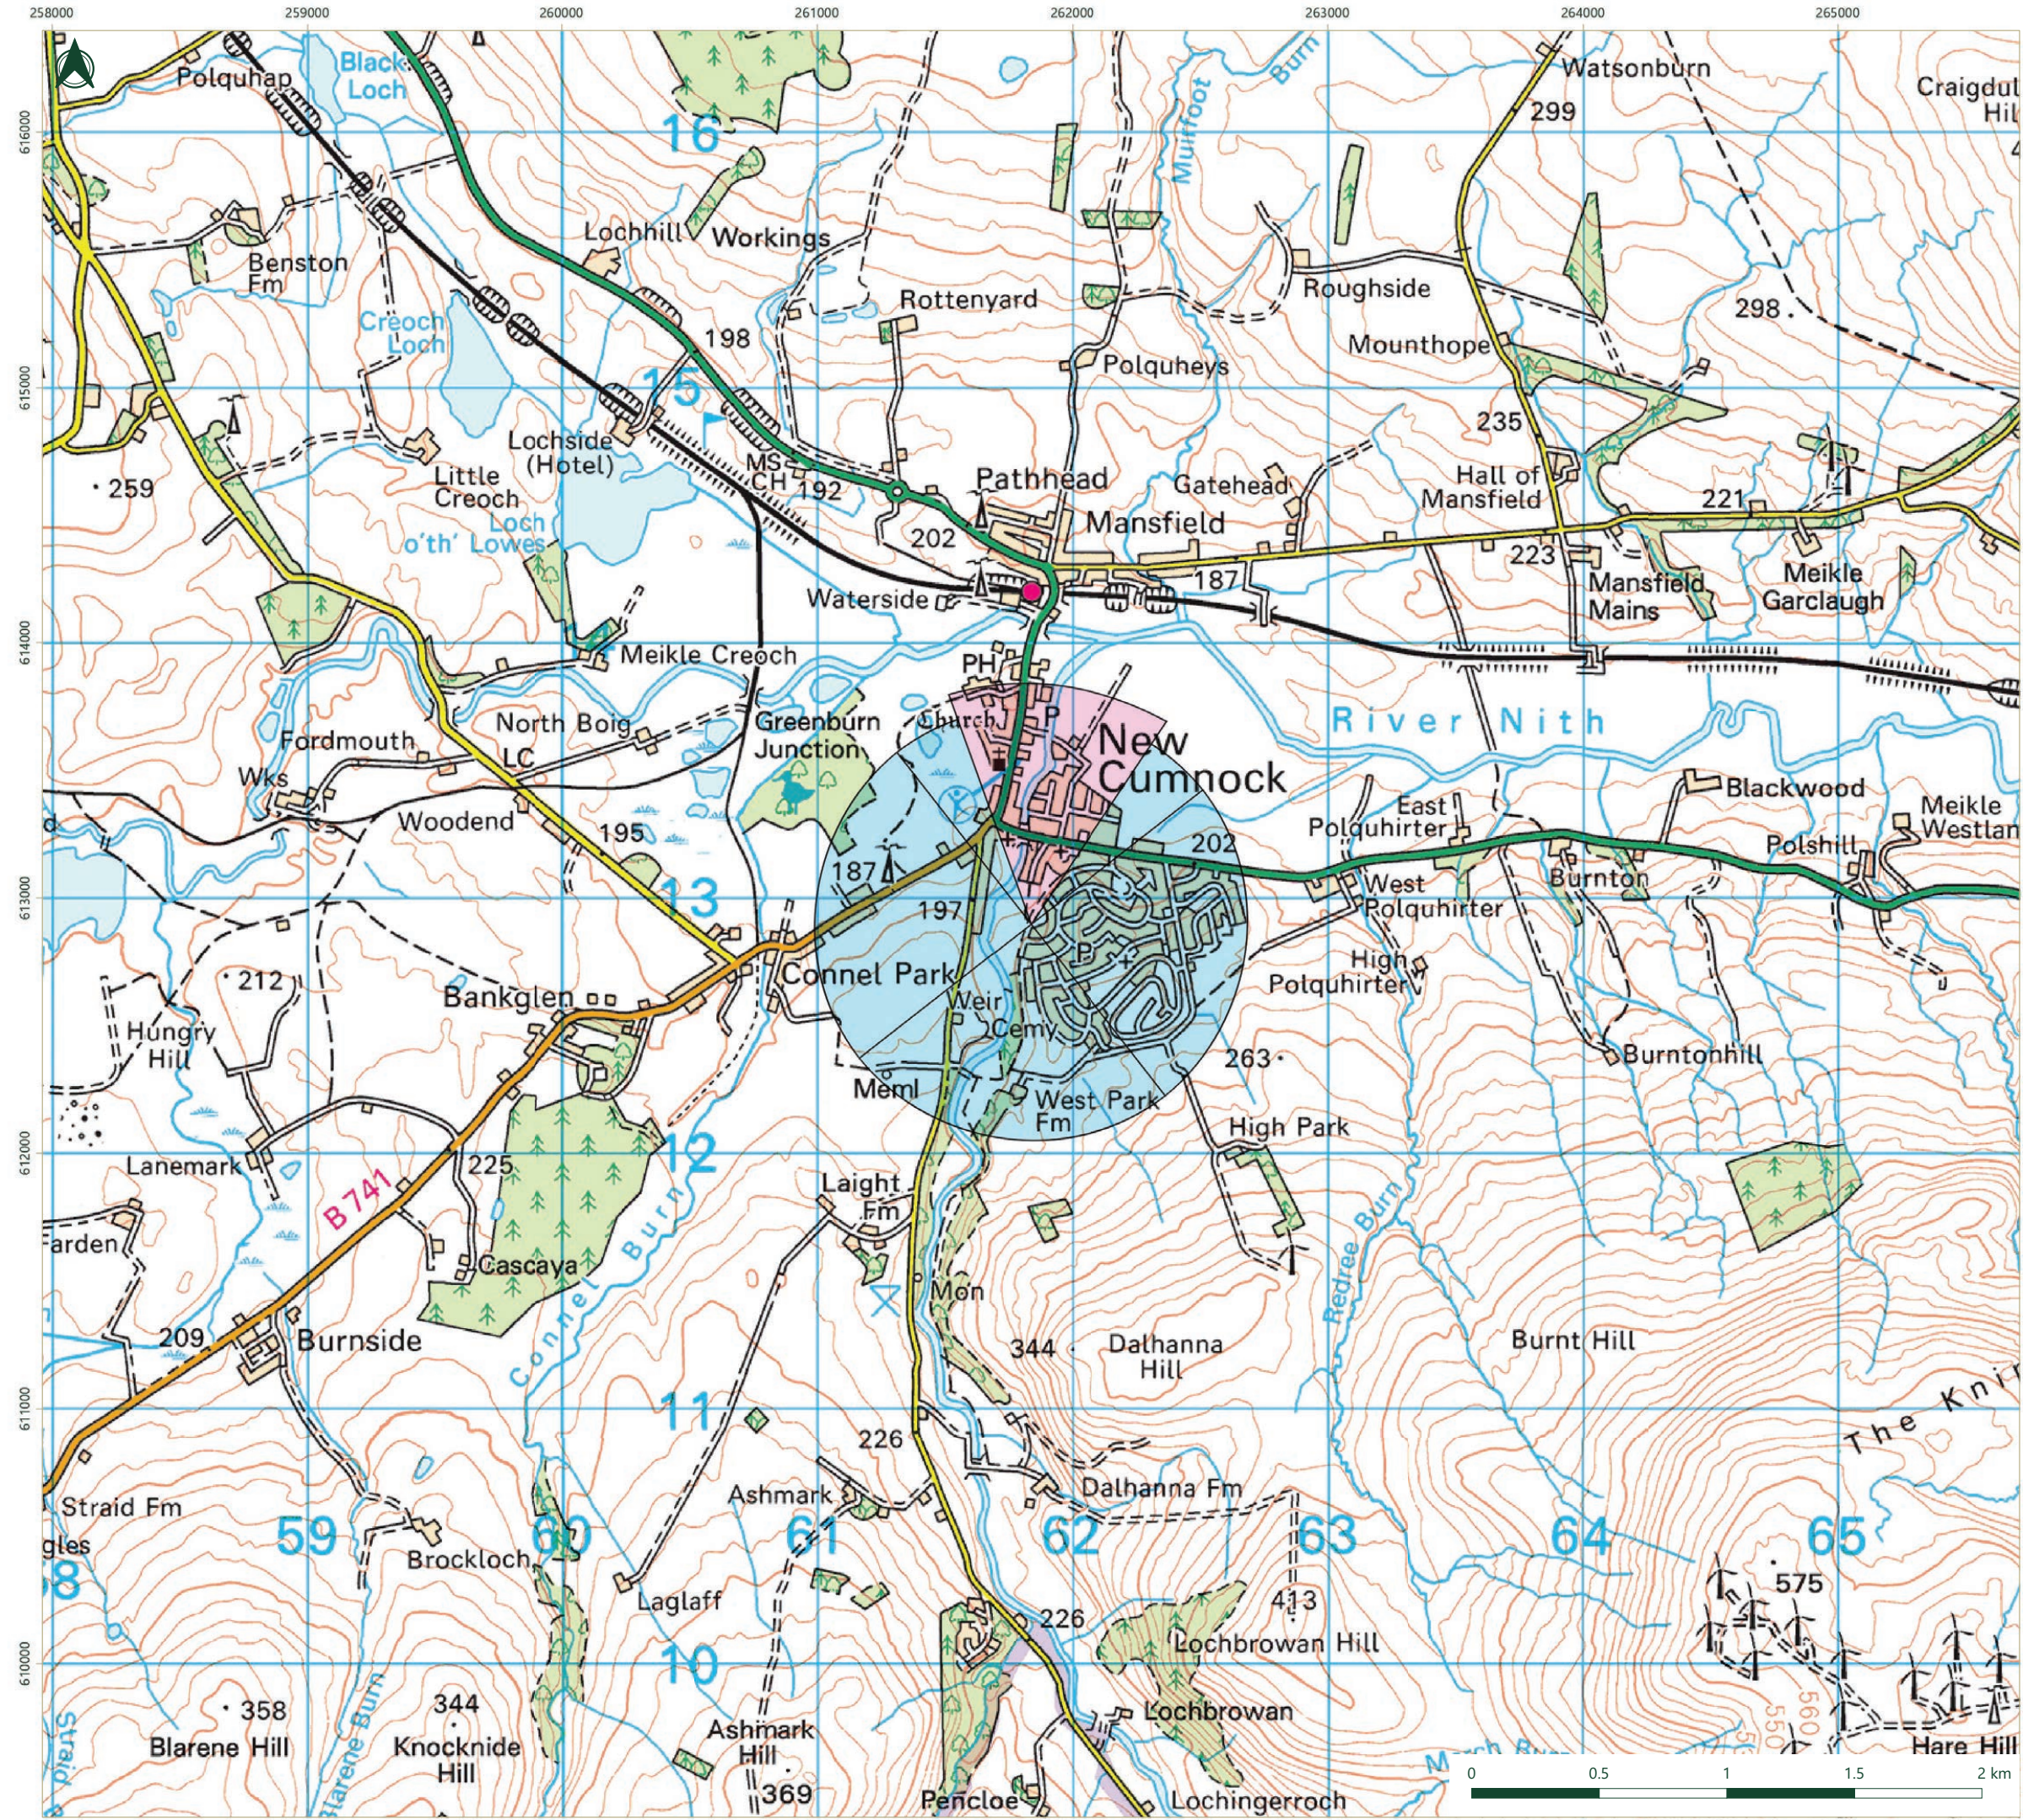

Predicted Change: The blades of a small number of the proposed turbines would just be visible amongst trees on the skyline to the north. One aviation light, on turbine 10, would potentially be visible, filtered through the trees.

Cumulative: Turbines at The Drum would be seen on a more open section of the skyline immediately right of the Proposed Development, they would be slightly more prominent, but the two schemes would be read as a single wind farm. Glen Water would be seen directly in front of these, extending further to the right and would appear much closer and would stand much taller on the skyline.

- 90° baseline panorama and cumulative wireline
- 53.5° photomontage
