Annex D Ornithological Survey Results

D.1 Flight Activity Records: Target Species

In accordance with NatureScot guidance (2025), target species are those which may be considered to be at risk from the potential effects of wind farms. All flights of target species within the site and the surrounding area were mapped and are detailed in **Table D-1**.

Table D-1: Details of target species recorded during flight activity surveys (sorted chronologically)

D.2 Scarce Breeding Bird Records

Table D 2 details all records of raptors and divers recorded during surveys, however only Annex 1¹ or Schedule 1² species are considered to be scarce breeding birds (i.e. target species). Refer to **Annex B** for survey methodology, **Annex C** for weather data and Confidential **Technical Appendix 7.2** for confidential data relating to goshawk, osprey and peregrine falcon.
