

0080-Figures-A3

LEGEND

Proposed Dalfad Turbines

Distance from Turbines (5, 15, 25km)

Viewpoints

Woodland

Buildings

Cumulative Wind Farms in Planning

Glen Water (200m)

The Drum (220m)

Other Wind Turbines

Operational wind turbines

Consented wind turbines

Zone of Theoretical Visibility to Dalfad, The Drum and Glen Water Turbines

Dalfad turbines visible

The Drum turbines visible

Dalfad and The Drum turbines visible

Glen Water turbines visible

Dalfad and Glen Water turbines visible

Glen Water and The Drum turbines visible

All sites visible

NOTES

This drawing is based upon computer generated Zone of Theoretical Visibility (ZTV) studies produced using the Viewshed routine in the Visibility Analysis plugin for QGIS. The areas shown are the maximum theoretical visibility, taking into account topography, principal woodlands and buildings.

A digital surface model (DSM) has been derived from OS Terrain 50 height data with the locations of woodland and buildings taken from the OS Open Map Local dataset. Buildings have been modelled with an assumed height of 7.5m and woodland an assumed height of 15m, representing a conservative estimate of average heights within the study area.

The model does not take into account some localised features such as small copses, hedgerows or individual trees and therefore still gives an exaggerated impression of the extent of visibility. The actual extent of visibility on the ground will be less than that suggested by this plan.

The ZTV includes an adjustment that allows for Earth's curvature and light refraction. It is based on a derived DSM and has a 50m resolution.
