

DALFAD WIND FARM

Viewpoint 2
Cronberry

Existing View: This viewpoint is located at the northern end of a row of residential properties to the west of the Bellow Water and A70. The view is open to the east across the valley, with ground rising to low hills which form a nearby skyline. Views to the south and west are largely shortened by nearby trees and buildings, and to a lesser extent to the north-east. Some operational and consented turbines are visible in the distance, between gaps in trees to the north-east (including some aviation lights at night) and southeast.

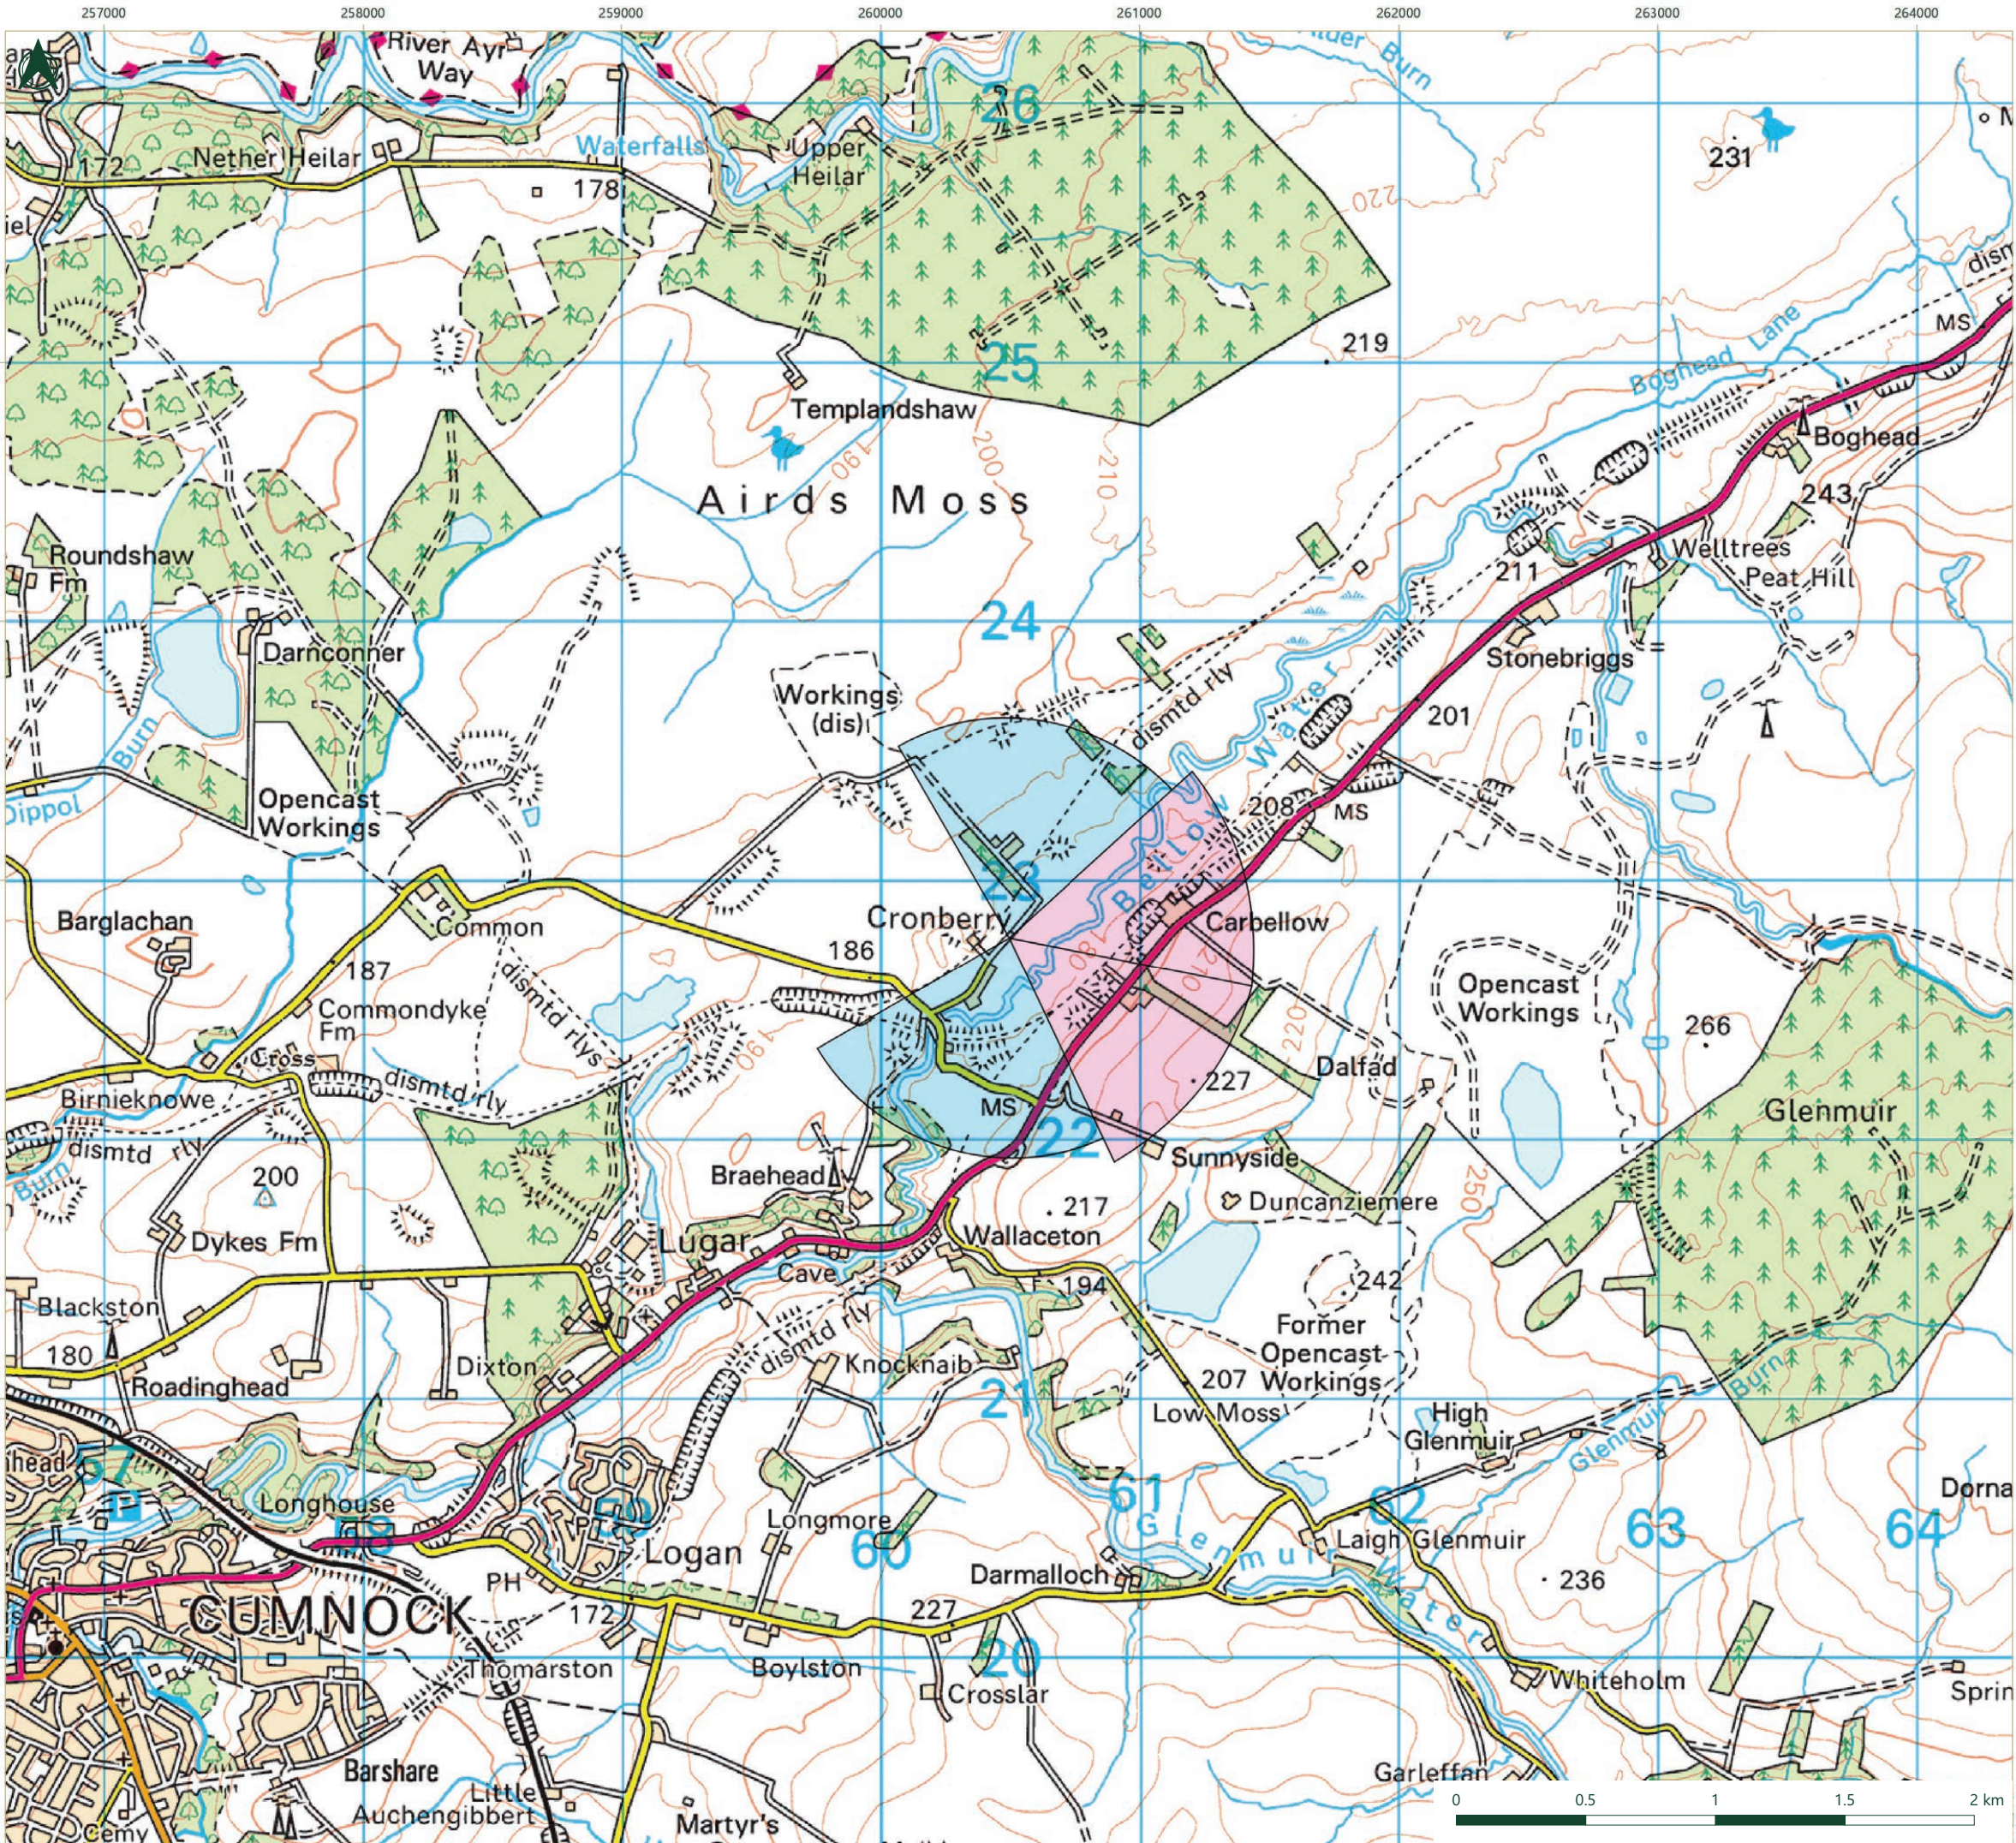

Predicted Change: The proposed turbines would be seen across the nearby skyline to the east, forming a prominent new feature in the view. Three aviation lights would be visible above the skyline, seen in the context of nearby settlement and street lights, and headlights of cars travelling on the A70.

Cumulative: The Drum would be visible behind the Proposed Development and together they would appear as a single wind farm, including additional aviation lights at night. Some turbines at Glenwater would appear more distantly, breaking the skyline to the right of these. Other proposed wind farms would also be visible, adding to operational and consented clusters to the south and north-east.

- 90° baseline panorama and cumulative wireline
- 53.5° photomontage
