

DALFAD WIND FARM

Viewpoint 12
B743

Existing View: This viewpoint is located at a forestry gate on the B743 to the north of Airds Moss. It offers expansive views to the south and east over the upper Ayr Valley, Airds Moss, and a large area of forestry, towards open hills which form the skyline beyond. Cairn Table and Wardlaw Hill form slightly closer and more prominent summits seen along the road to the east while rising ground and forestry constrains views to the north and west. Clusters of existing and consented turbines are seen across the skyline in the open sections of the view, including to either side of the more prominent hill landforms.

Predicted Change: The Proposed Development would be seen behind the nearby forestry across Airds Moss to the south, on one of the lower and flatter sections of the skyline. It would be seen in front of more distant operational and consented schemes along the skylines in this direction. They would be closer and appear larger than other turbines seen in this view, but their prominence would be moderated by the expansive nature of the views. At night, all three aviation lights would be openly visible, seen in front of more distant aviation lights on the consented Lethans and Glenmuckloch turbines and in the context of lights on other turbines in the wider view.

Cumulative: The Drum and Glen Water would appear behind the Proposed Development and would appear as a single wind farm. Further proposed turbines would appear in the distance to the south beyond Glen Water and to the south-west, adding to distant clusters on the horizon.

- 90° baseline panorama and cumulative wireline
- 53.5° photomontage
