

DALFAD WIND FARM

Viewpoint 11  
Tarbolton

Existing View: This view is taken from a public footpath at the eastern edge of the settlement at Tarbolton. The outlook is open form northeast to southeast across sweeping mosaic farmland with dispersed farm buildings, woodland and tree belts throughout the view, crossed to the east by a line of pylons. Undulating moorland and forestry covered hills form a distant skyline beyond the farmland and woodland, where operational and consented turbines are seen to the east and south.

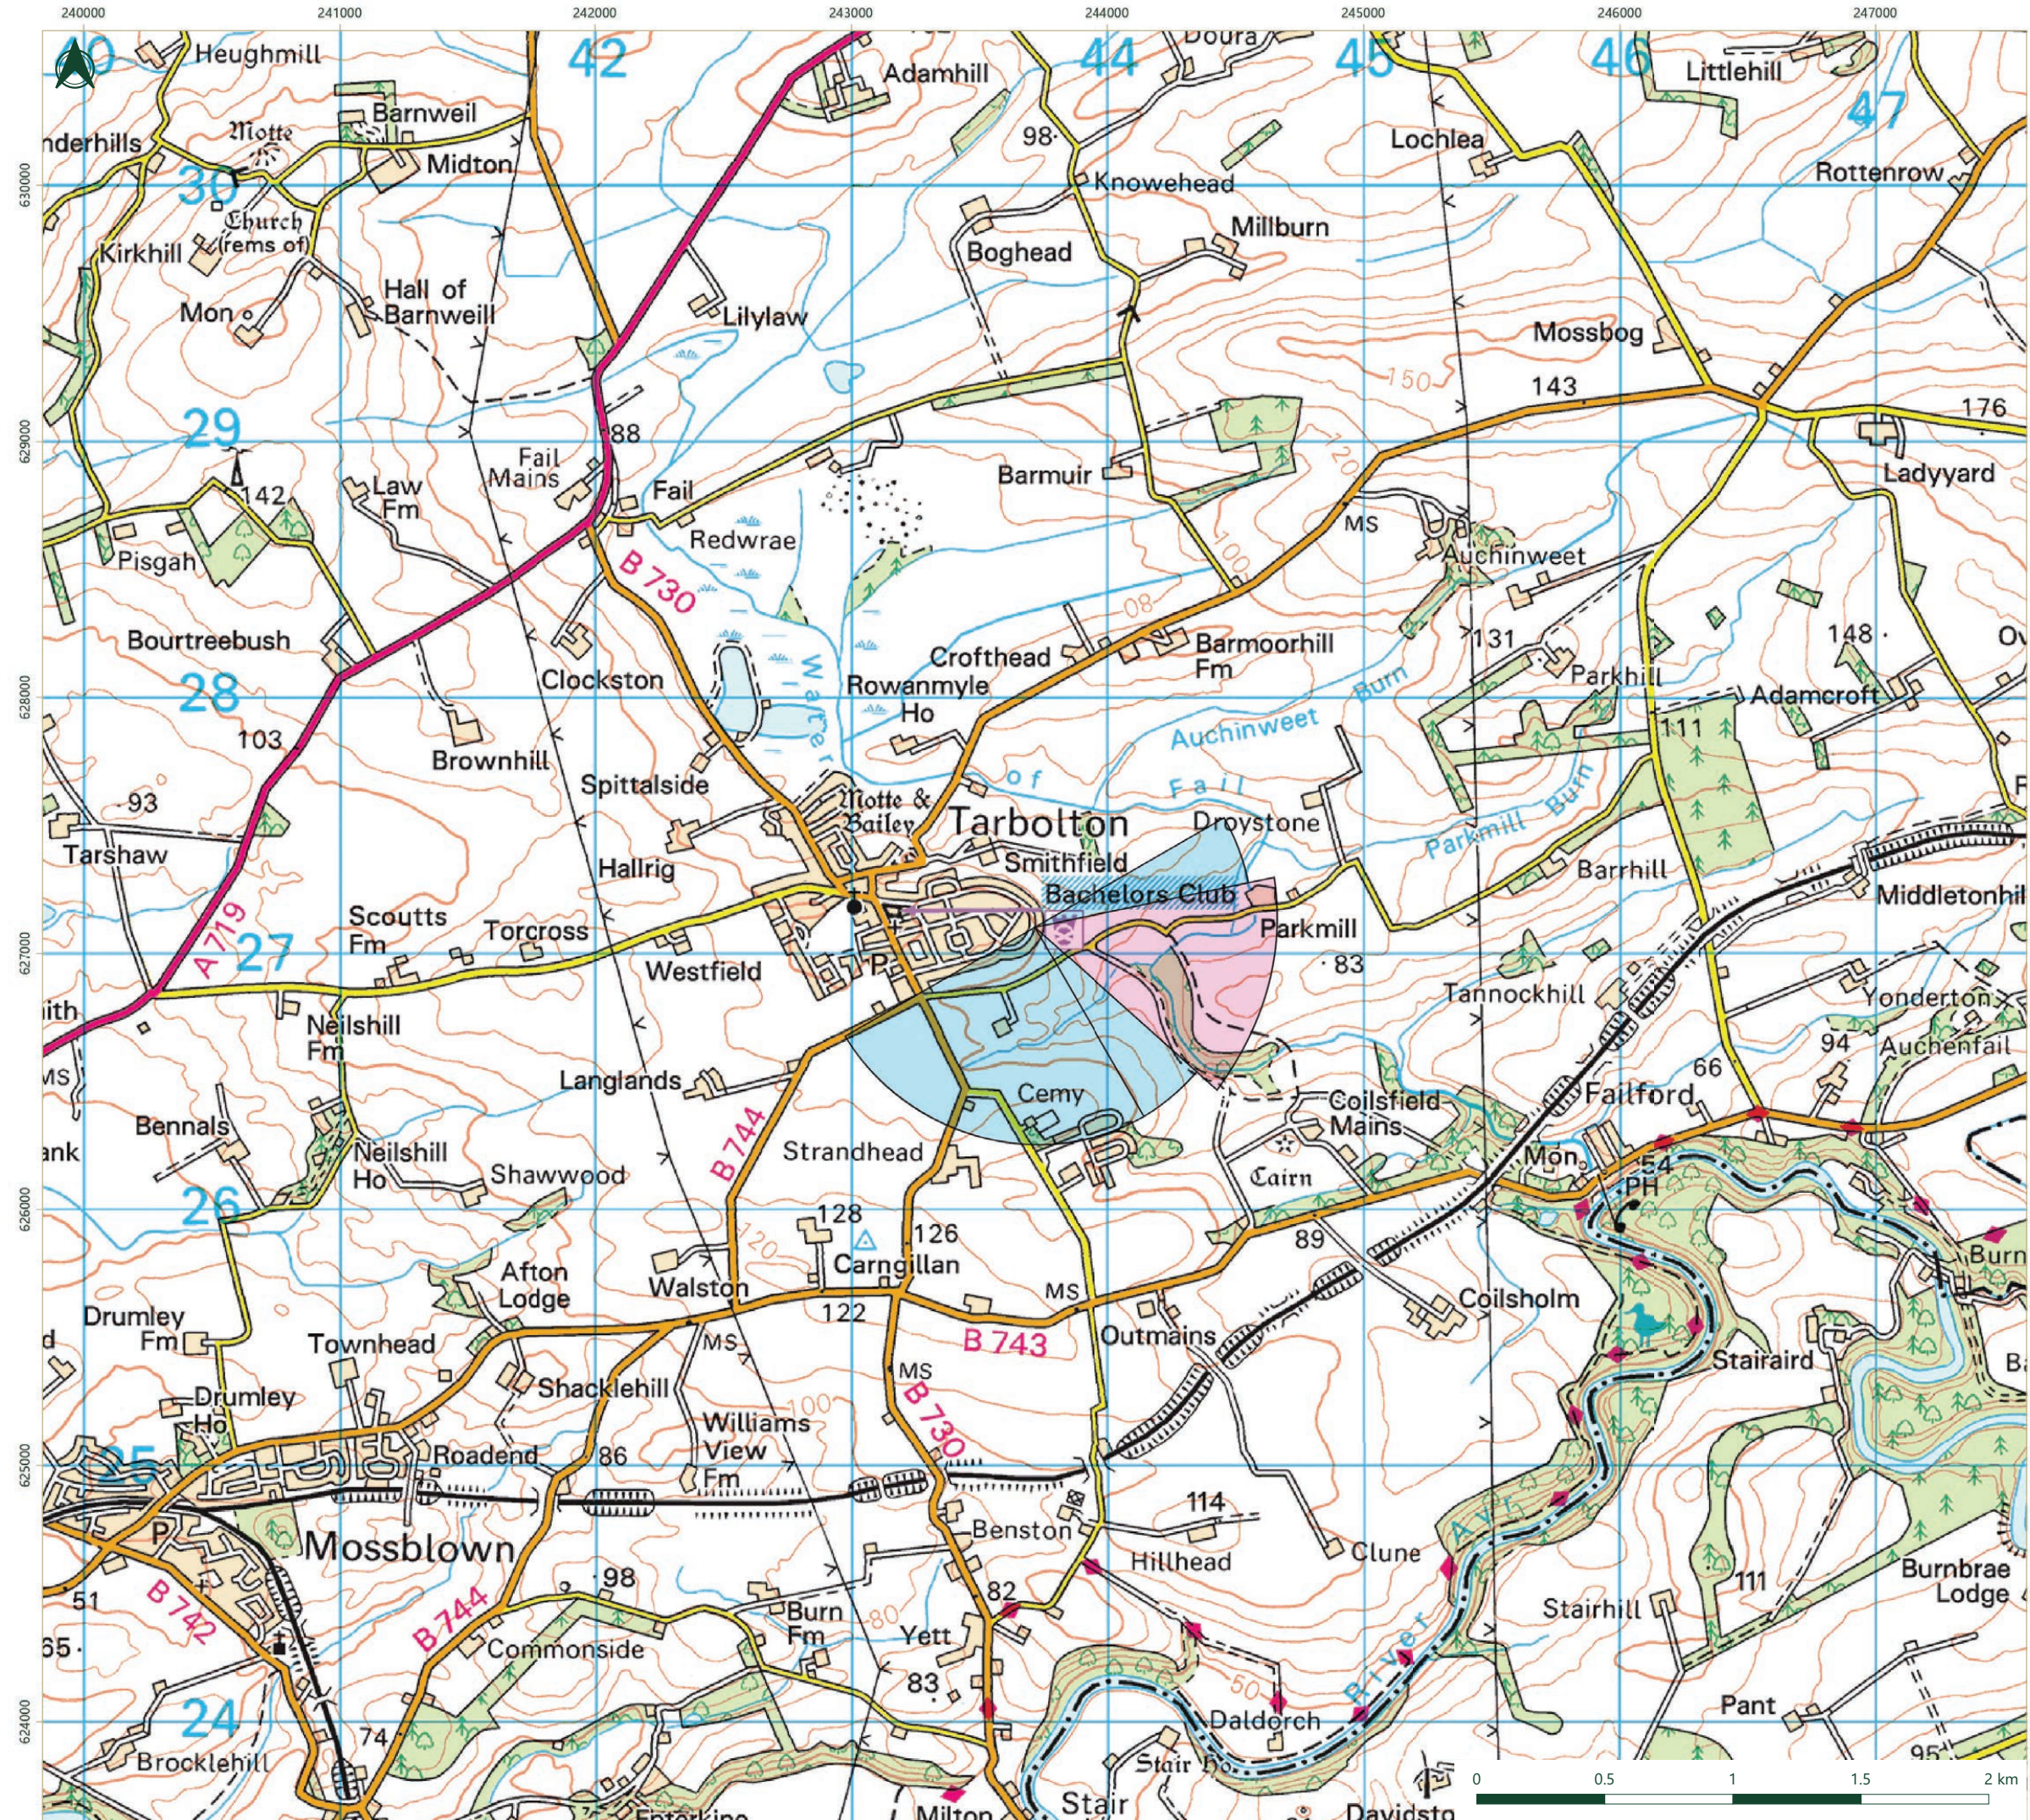

Predicted Change: The proposed turbines would be seen in the distance to the east above the pylons and would extend the group of consented turbines at Lethans across towards those at Kennoxhead. All three aviation lights would be seen at night alongside those on the adjacent consented wind farms.

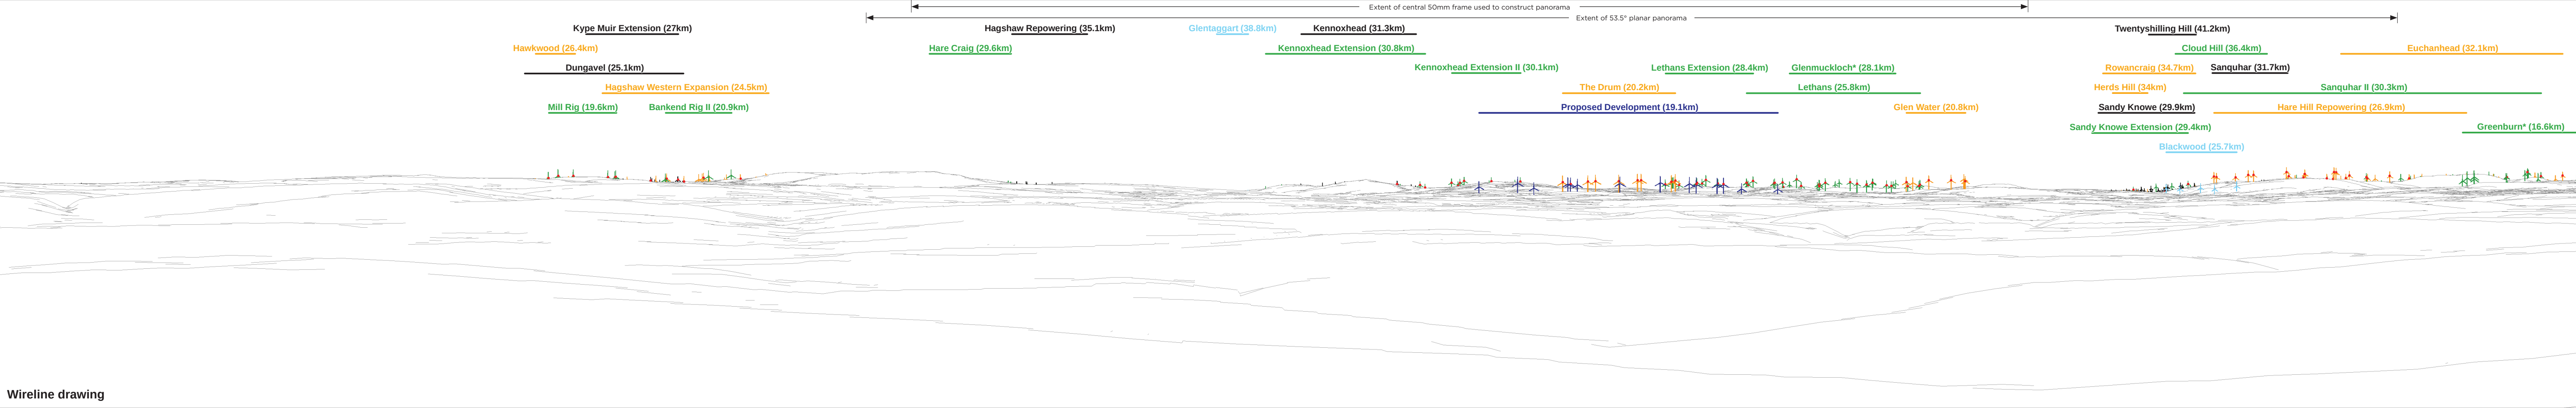

Cumulative: The Drum, including its aviation lights at night, would appear behind the Proposed Development, and the two would appear as a single wind farm. Glen Water would be seen to the opposite end of Lethans, slightly extending that group. Further Proposed turbines would be seen to fill in gaps between clusters, adding to the density and spread of turbines development to the southeast and south.
