

DALFAD WIND FARM

Viewpoint 9
Dumfries House

Existing View: This view is taken from the upper terrace of the walled garden at Dumfries House. Ornate gardens, pavilions and containing walls make up the view to the west, north and east. Land slopes down to the south, providing views into adjacent woodland within the estate and framed views to forested skylines in gaps between woodland to the southeast and south. Blade tips of some consented and operational turbines may be visible over woodland to the north and east and heavily filtered through branches in winter.

Predicted Change: The proposed turbines would be entirely screened from view by dense woodland, estate walls and buildings and there would be no change to the view.

Cumulative: Turbines at Glen Water wind farm may be visible above the forested horizon to the east.

- 90° baseline panorama and cumulative wireline
- 53.5° photomontage
