

DALFAD WIND FARM

Viewpoint 13  
River Ayr Way

Existing View: This view is taken from the long-distance footpath in low-lying farmland beside the River Ayr. Farm buildings and small areas of woodland are seen to the south and south-east, with moorland covered hills rising behind and enclosing the valley. Woodland and trees continue to provide some enclosure in views to the east, north and north-east while views to the south and south-west are more open but shortened by the undulating topography.

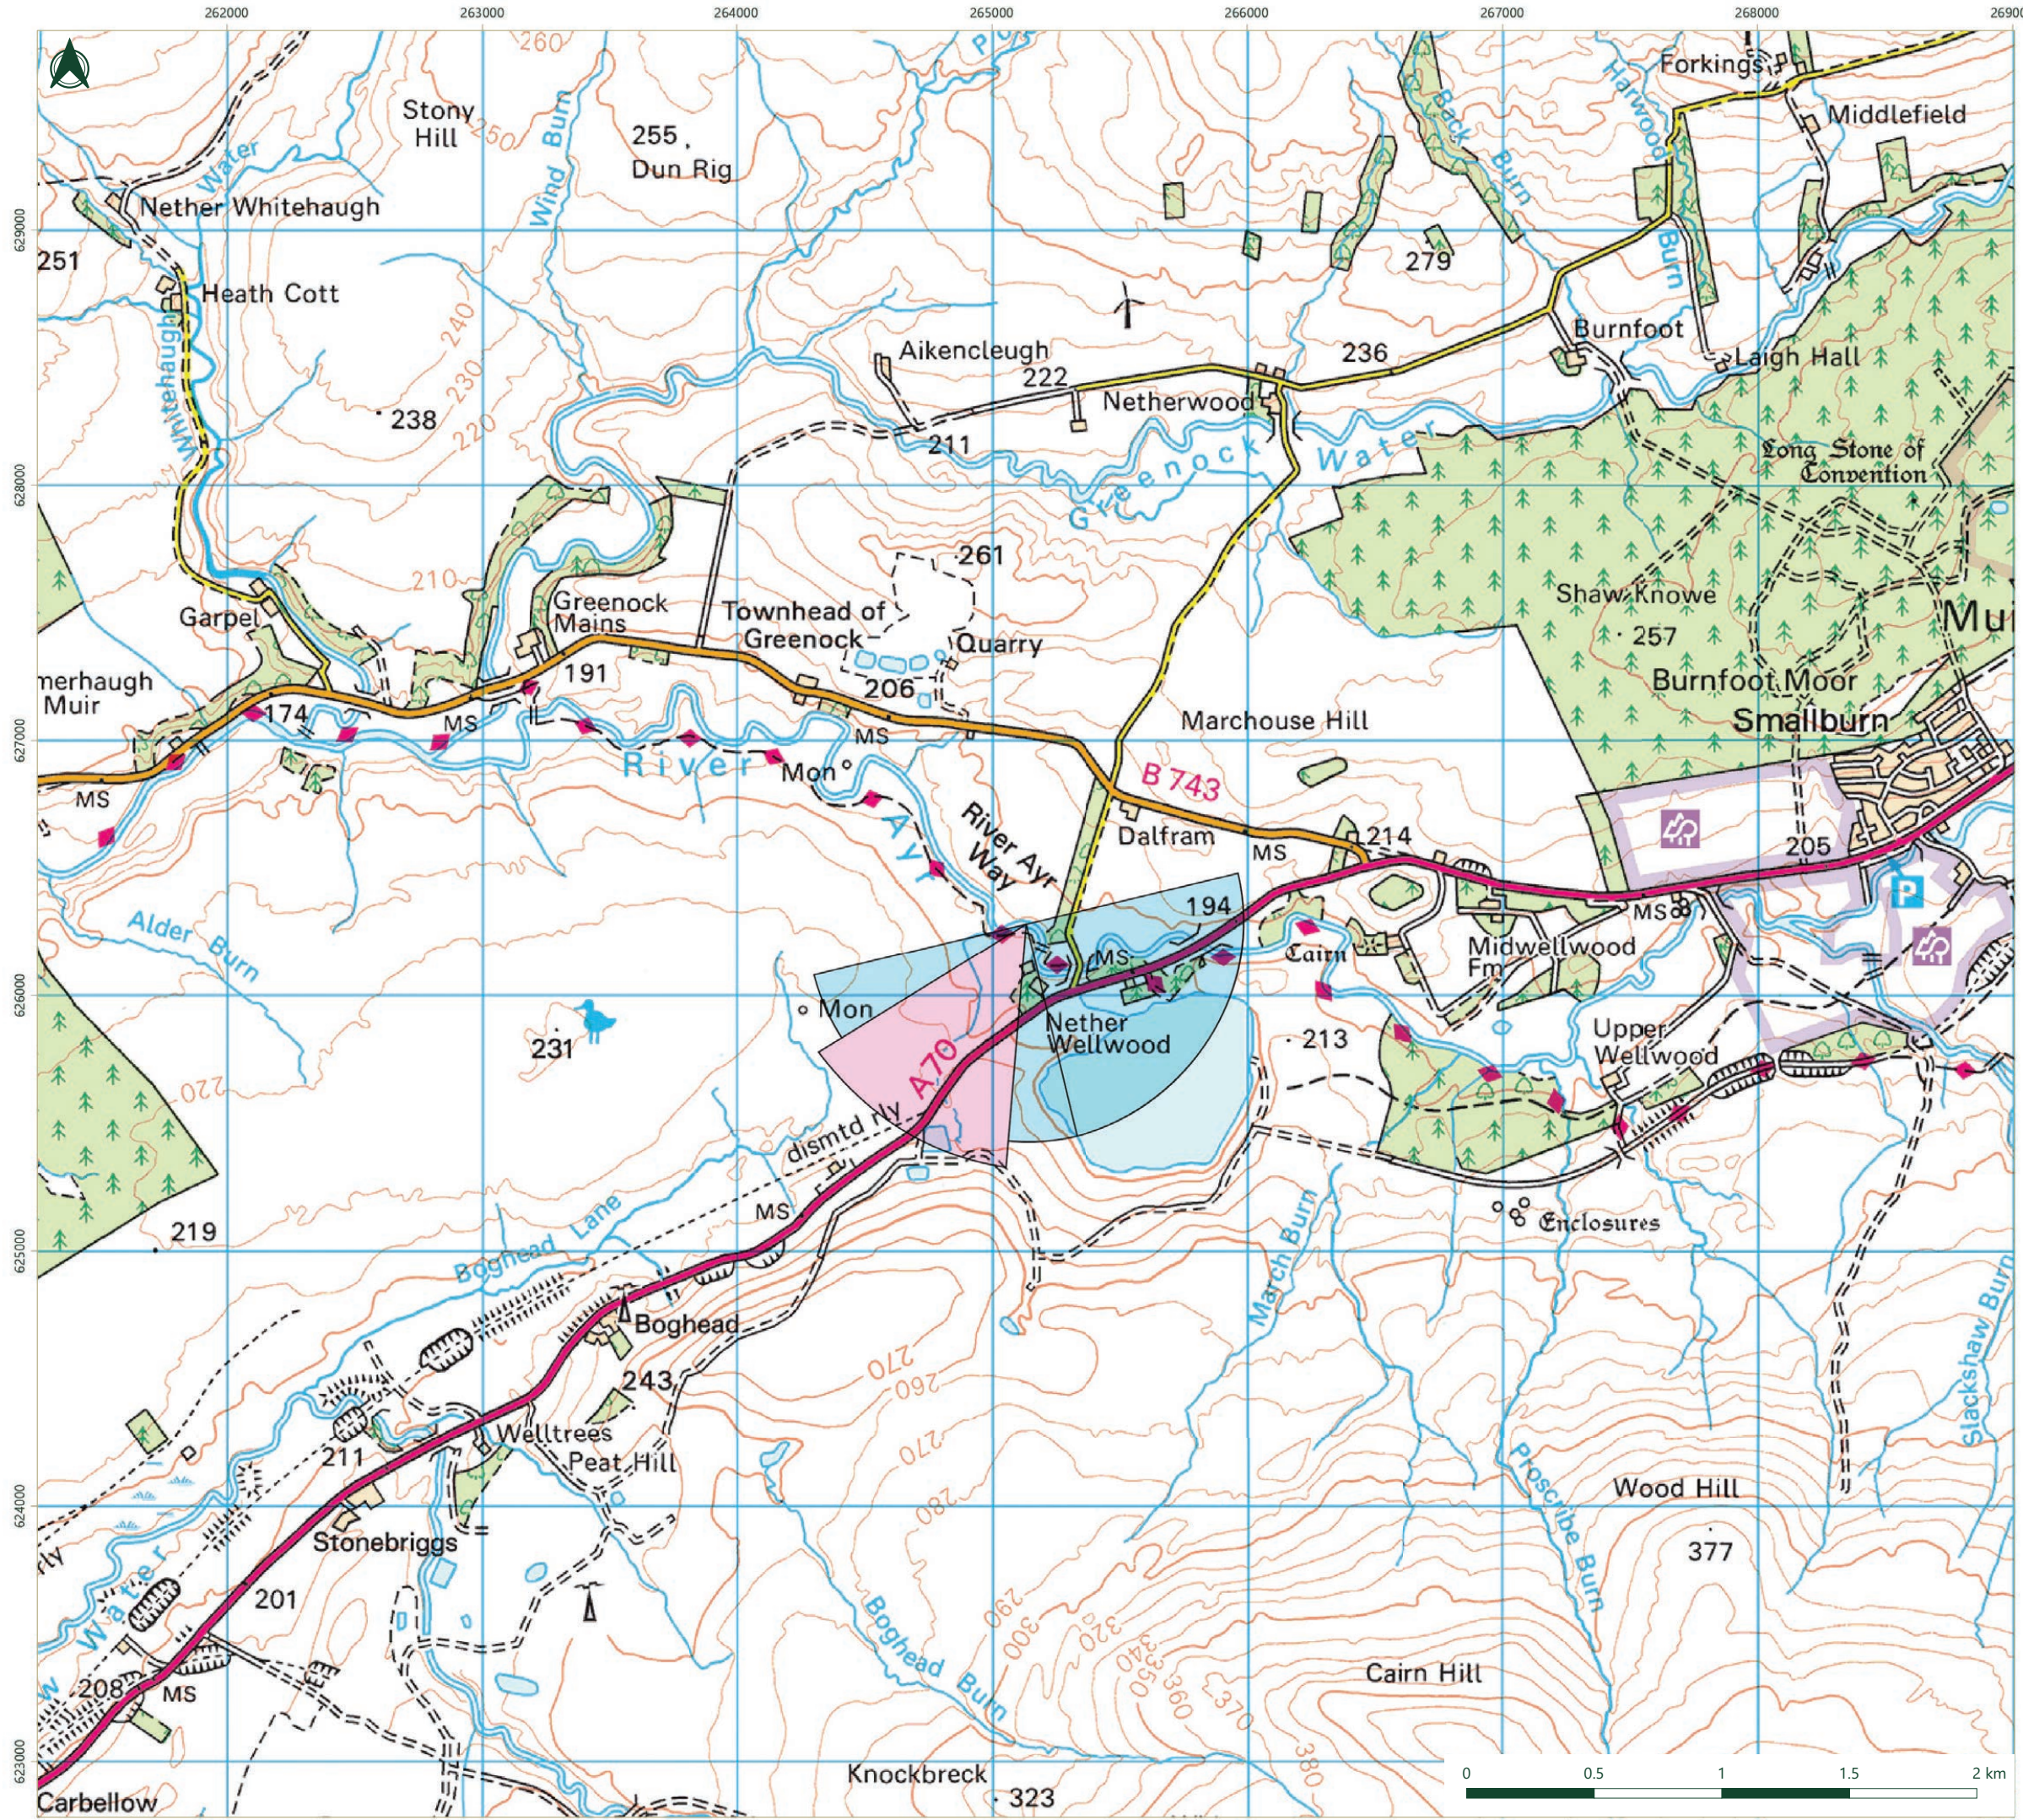

Predicted Change: The Proposed Development would be visible on the skyline to the south-west. The hubs of turbines 1 and 2 would appear just above the skyline and the blades or blade tips on a further five turbines would be seen over the skyline to either side. None of the proposed aviation lights would be visible from this location.

Cumulative: The blades of some turbines at The Drum would be seen on the skyline, extending to the immediate left of the Proposed Development. None of the hubs or aviation lights would be visible, nor would any other proposed wind farms.

- 90° baseline panorama and cumulative wireline
- 53.5° photomontage
